

NILMDTS Announces Partnership Alliance with Box.net

*Alliance Provides Digital Retouch Artists with Tools
to Share Editing Load and In Turn, Assist More Families*

Instructions for Box.net Account for NILMDTS Image Use:

Box.net has provided NILMDTS with a Box Business Account to give all NILMDTS members the ability to upload NILMDTS photos, giving re-touch artists easy access to them. To upload your NILMDTS photos now, go to www.box.net and log in using the following information:

Email: headquarters@nilmdts.org

Password: photoshare08

Then take the following steps:

Step 1: Click on "My Files".

Step 2: Click on "New Folder" and enter a name for the folder. Go into the new folder.

Step 3: Click "Upload". You can either add files by browsing for the file name ("Add Files") or click on "drag and drop". The drag and drop option is recommended for large files, but you must be running an [updated version of Java](#) to use the feature. Please be aware that upload speeds may be limited by your Internet Service Provider, so large files may take some time to upload.

Step 4: Once photos appear in your folder click on "Share a view only link" then click send link and enter the email address of the re-touch artist you need to send the photos to. You can also copy and paste the link and send it through your own email system.

Getting Your Own Account: Box.net for Photographers for File Sharing & Access

Sharing large files with colleagues and clients is an important part of a photographer's job. But email is impractical for such large files, physical media (like discs) can be lost or broken, and FTP is cumbersome.

Box.net makes file sharing with colleagues and clients simple. For any file or folder in your Box, you can create a unique website address (URL) which can be accessed by anyone you give the link to, even if they are not a Box.net member. For additional security, you can create a password for that link.

Box.net also solves the problem of access. Because you can upload, download, and access files anywhere you have an Internet connection, you no longer have to be in front of your desktop computer to work with your files. You can upload photos from a shoot and make them instantly available to colleagues, clients, and other individuals whether you're in a studio or out on location.

Make simple edits to any photo using Picnik directly from your web browser without the hassle of downloading the photo and re-uploading it.

Click here promo.box.net/partners/nilmdts/ to learn more about Box.net and how to use it.

Click here <http://promo.box.net/partners/nilmdts/> to sign up for a 14 day free trial and receive a 15% discount on your Box account. A portion of your account fees will be donated back to NILMDTS.
